

April, 2008

Dear Parents,

We hope your children all enjoyed their spring break, and we are now enthusiastic for all of our exciting activities for the last two months of the school year!

We have some special events coming up in April! As you know, your children are preparing for the 3rd grade music program about Colorado history. They will perform for the school at 2:00 on Thursday, April 17, and again for families that night at 6:30.

On April 23, we will get to experience an inflatable space lab from CU! This will be a great hands-on addition to our space unit!

That same day from 3:00-4:00, we will host a Math Afternoon in the 3rd grade classes! This will be a time for you to come and have your children show you some of the math games and concepts we have been learning. Please let your child know if you will attend, so they may stay after school that day, and then go home with you at 4:00.

We continue to encourage your children to learn their math facts and to read every night!

It is not too early to be thinking about our big spring event, the Mile Marathon! On May 23, we will need plenty of parent and teacher volunteers to help set up and staff the Mile Marathon, in which all our kids get to run a mile! To help with planning, come to the PTA meeting or talk to Deb Anderson or Wanda. There will be a sign up poster in the front lobby sometime in early May.

Thanks for all your participation in your child's education!

Sincerely,

The Third Grade Team
